OUR PROMISE.

Experience the Vista

With Vista System, you get what is expected from a leading international sign manufacturer.

- Availability of service through thousands of sign professionals worldwide.
- A modern, contemporary clean look.
- Simple to use and easy to update by yourself.
- Maximizing modularity with a wide range of sizes.
- Providing a comprehensive solution with an unrivaled range of applications that covers the entire project for a competitive price.
- High quality, 100% guaranteed product.

The U&I Method:

We hope you will enjoy our new guidebook, and find it useful and convenient.

As you may have noticed, we often mention in our literature that we operate according to the U&I business method. The U&I method was developed by us with a specific goal and is our promise to the market.

We strive to continually provide an "Unbelievable & Incredible" experience to our customers with everything we do.

Sounds overstated? Well, we mean it! We realize that our customers expect their service to improve and not decline. We also understand that's exactly what gets us excited about being in business in the first place: The challenge of discovering just how far we can go to impress you, to excite and surprise you and to improve your well being as a result of doing business with us. Focusing on this goal requires our team to constantly work hard on improving, creating and generating new ideas as to how we can improve your well being. This type of focus and purpose generates a positive atmosphere amongst our company and makes it a great place to be in.

We invite you to join our excitement!

We are green!

In 2007, our design team began reviewing and redesigned most of our system to make sure it is as green as possible. The outcome is an eco-friendly signage solution that minimizes waste and allows for efficient recycling!

Vista System has been inspected & certified by Green Busines Partnership, is a member of USGBC, and is an active member and education sponser of SEGD - the Society for Environmental Graphic Design.

Longevity

When redesigning the Vista System, we placed longevity as our key concern. We concentrated on achieving sustainability via general material selection, the fabrication process, and final disposition. Successful modular systems are based on the ability to change elements of the sign while maintaining the system over a long period of time.

Materials

We have chosen aluminum extrusions as the basis of our system accompanied by attachment components made from aluminum and steel, which are all protected against corrosion to promote longevity. We choose to supply our plastic parts from materials such as polycarbonate for outstanding durability and resistance to vandalism.

Insert System

The frame or sign holder system allows for easy updating of the insert without the need to replace the whole sign.

Design

Designing a product that can be described over time, as having a “contemporary look” is as important as the length of time the products can physically withstand the elements.

Air & Environment Quality

We have chosen to use mechanical fasteners instead of harmful out-gassing adhesives. We have invested in redesigning our system to eliminate the use of adhesives for connecting components completely!

Resource and Waste Management

The Vista System is based on modular components that are easy to separate into individual elements that can be taken apart and reused or sent for recycling. We have challenged our designers to come up with solutions that are both pleasing to the eye and fully recyclable.
We reuse packing materials as much as possible, recycle the materials that are not reusable and finally, introduced recyclable, lightweight cardboard-based pallets, which have replaced the majority of wooden pallets used thus far.

Energy Efficiency

We have recently redesigned all of our extrusions to reduce their weight to the minimum necessary without jeopardizing the integrity of the product. This reduction in material reduces the use of energy used in the manufacturing process, transportation and the eventual aluminum recycling process.
Vista System, being a frame- based system, allows for the use of many types of substrates. This gives great flexibility to choose the most energy efficient substrate materials available now and in the future.

Vista System Frames Support ADA

All Vista System frames support ADA (Braille) technology inserts.

The modular structure of the Vista product lines, enable rapid design, installation, and maintenance of Braille technology inserts.

Advantages

- Fully compliant with ADA standards.
- Uniform design with integrated ADA.
- Can be printed in a variety of sizes and designs.
- Fast and easy installation saves you time.
- A comprehensive solution at a competitive price.
- Easily upgrade existing signage to meet ADA compliancy requirements.

Are you interested in getting your Vista frames including ADA inserts ?

WE CREATE **SIGN SCHEDULES**

Vspec

Vspec was created in order to make life for you, the sign professional, much easier when you approach any project. This is the ultimate tool to help you pitch to decision makers and get an edge over your competitors.

OUR EXPERTISE

- **BLUE PRINT ANALYSIS**
  Send us the project's blue print and we'll analyze it ourselves.
- **LOCATION PLAN**
  All signs in the project will be mapped and located on the blue print.
- **QUANTITY TABLE**
  Includes a list of sign types, quantities and prices.
- **SIGNAGE SPECIFICATION**
  Let us specify the signage needs for your project.
- **PRESENTATION**
  The result is a professional and impressive printed presentation.
- **GRAPHIC DESIGN**
  Our designers will create a specific graphic design line for the signs in your project.

The result:

An impressive sign schedule with the highest level of design. This will include a table of quantities, sign locations and map with graphics showing your specific text and color schemes!

Curved Modular Way-Finding System

- Comprehensive solution
- A wide range of sizes
- Handles all graphic applications
- Easy to adopt
- Environmentally friendly

Vista System is a world leading curved way-finding system that offers comprehensive solutions for every project: suspended signs, flag signs, directories, double sided pylons, triangular pylons, post signs, table stands, and many more. No other curved system can offer such a comprehensive solution.

The system is designed to handle most applications and materials used in the sign industry (printed-paper, engraved, embossed, screen-printed substrates, photo-metal, photo-polymer, vinyl graphics, tactile, and more). The materials used include polymers and metals of all types, plastics, paper, etc. Any material with flexibility and the correct thickness may be used as an insert with Vista System frames.

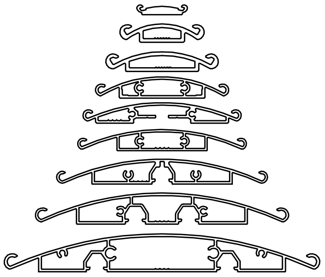
Main Building

Information

Next Window Please

Vista System is the only system featuring more than 80 different extrusions, creating unlimited widths and shapes. This wide choice of sizes and shapes allows the customer to stick to one sign system throughout a project, and to find solutions to almost any kind of sign required.
Signs sized 16-400 mm have a complete vista profile.

Signs from 420 mm wide and up use the VBS profile which makes them lighter, greener and more cost effective, while still providing a solid frame.

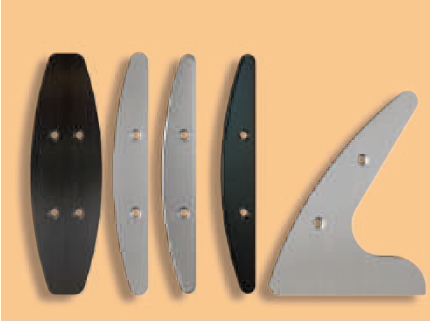


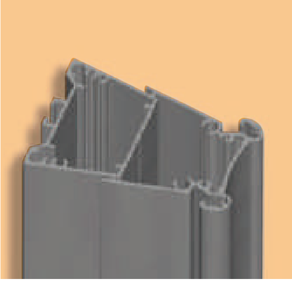
Gripper Extrusion:
The VBS side channel has an inner track into which a special plastic profile, that is designed to grip and hold the insert in place, is inserted. This greatly improves the hold of the insert to the sign itself.

Standard finishes for vista profiles are silver and black anodized.
Custom sizes and finishes are available upon request.

End caps:

Vista System offers both plastic and metal end caps. The end caps are available with screws for maximum security to avoid vandalism. Plastic caps are made of a custom formulated polymer of unique flexibility and resilience that can be painted. The metal end caps are made of aluminum with silver or black anodized finishes and include stainless steel screws.



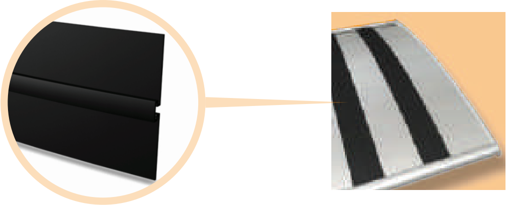


Screw bosses for structural purposes:

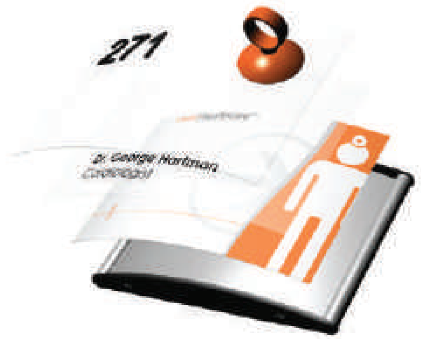
Vista System offers a revolutionary solution for attaching and installing signs with no need for the welding and/or building of metal construction for support. A system of massive channels (screw bosses) for screws are inside the extrusion itself, enabling the construction of an enormous selection of elements within minutes and without any welding or special tools.

Separation strips:

Vista System offers an integrated system which allows a sign to be divided into separate changeable slats within one sign.



Vista System signs are very easy to update. Just pull out the clear cover, change the graphics and place the clear cover back!



Vista System frames can accept ADA technology inserts. We supply ADA inserts, ask your Vista rep. about it!

Vista System – a complete solution for the entire project!

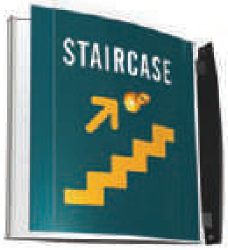
Projecting Signs



Projecting Signs
The projecting signs are designed to accept standard size extrusions.
Three types of bases/brackets are offered:

- Wall Brackets (WB)
- Simple Base (WBSB)
- Flag Sign (FS)

Directories

Vista System directories are fast, easy and simple to assemble and install. There is no need for special tools. The system has the advantage of flexibility to accept a variety of insert materials as well as the complete freedom to determine the height of each information strip, you decide how the sign will be sectioned by placing the separation strips as needed. Where? Wherever you decide, according to your design.

Multi-Sign Directory

Vista System directory signs are easy to maintain and update. The advantages of this simple system are flexibility when it comes to the overall width of the sign and the ability to add additional panels. It offers a perfect choice, since its' innovative design allows for easy installation, removal and replacement of the signage, even by a novice.

Double Sided Pylons

Vista System offers a range of bases and end caps that utilize the built in screw bosses allowing all sign holders to be assembled using only a screwdriver. This feature of the system is used to create freestanding convex, double-sided signs to be used with standard sign substrates, without interior illumination. Great for show rooms, lobbies,parking lots , airports, hospitals, office buildings, campuses, libraries and more!

Triangular Post Signs
A triangular freestanding sign utilizes a short post section and a matching base to support the main triangular directory element. An additional post section is used to set the header apart from the main element.

Triangular Pylons

A triangular pylon, utilizing short sections of Vista post extrusions between frame sections to create an attractive way-finding system.

With Vista, customized signs are affordable. By using standard extrusions and components, custom designs are cost effective. Our staff will assist you in creating the product you need. Assembly is simple, and the only tool required is a screwdriver. Bases are available for both permanent and portable applications.

Frameless Modular Way-Finding System

- Frameless elegant look
- 2 endcaps + 2 profiles frame
- 4-sided extrusion frame
- Paper inserts / rigid graphic substrates
- Standard paper sizes
- Easy to update

Vista Sharp is by far the most innovative flat, frameless and sleek looking indoor signage system.

It is ideal for any specification, for either small or large projects.

The system offers wall and door frames, directories, flag signs, suspended signs, table and pylon signs - so the entire space remains cohesive and elegant in its simplicity.

Information

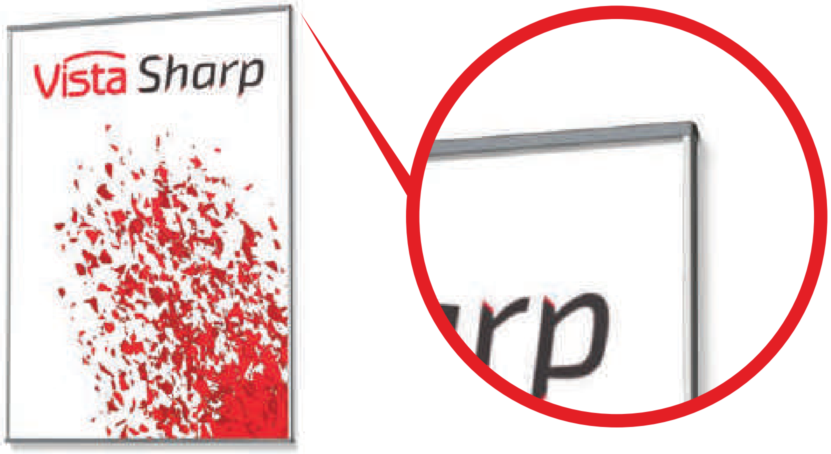
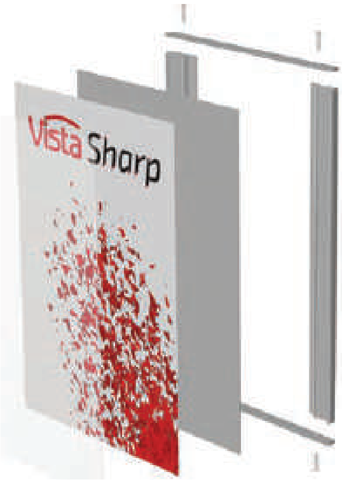
A sharp and frameless look makes it a perfect candidate to blend in with any commercial or business environment.

Vista Sharp offers two versions to the frames that are designed to display graphic content in two basic ways: paper graphic inserts, or rigid graphic substrates (such as D-Bond / X-Bond).

A frame built by 2 aluminum extrusions and 2 end caps (aluminum / plastic).



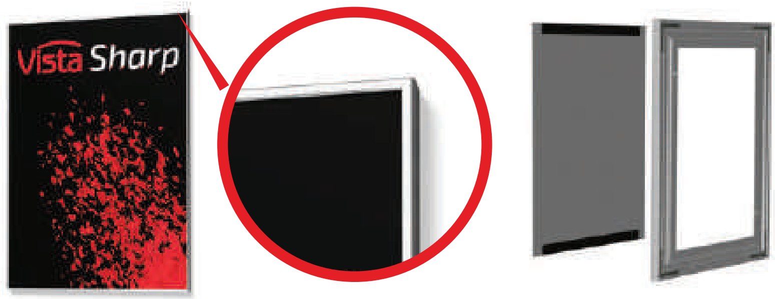
Vista Sharp
rp



Vista Sharp

This type of frame comes in the following sizes: A7, A6, A5, A4, Letter, 11, A3, and the maximum recommended length for these signs is 420mm.

4-sided extrusion frame built from the same aluminum extrusion cut to a 45⁰ angle.



This type of frame comes in the following sizes: A6, A5, A4, Letter, 11", A3, 14", 400, 420, 17", 500, 22", 600, 700, 800, 900, 1000mm, and the maximum recommended length for these signs is 1000mm.

Vista Sharp signs are very easy to update. Graphic changes are fast and easy.

Vista Sharp frames can be mounted on the wall using standard screws, double sided tape or silicone glue.

Vista Sharp

Vista's variety of signs, models, sizes and modularity are now enhanced by the new Vista Sharp.
Once again, Vista System surprises by thinking outside the box.

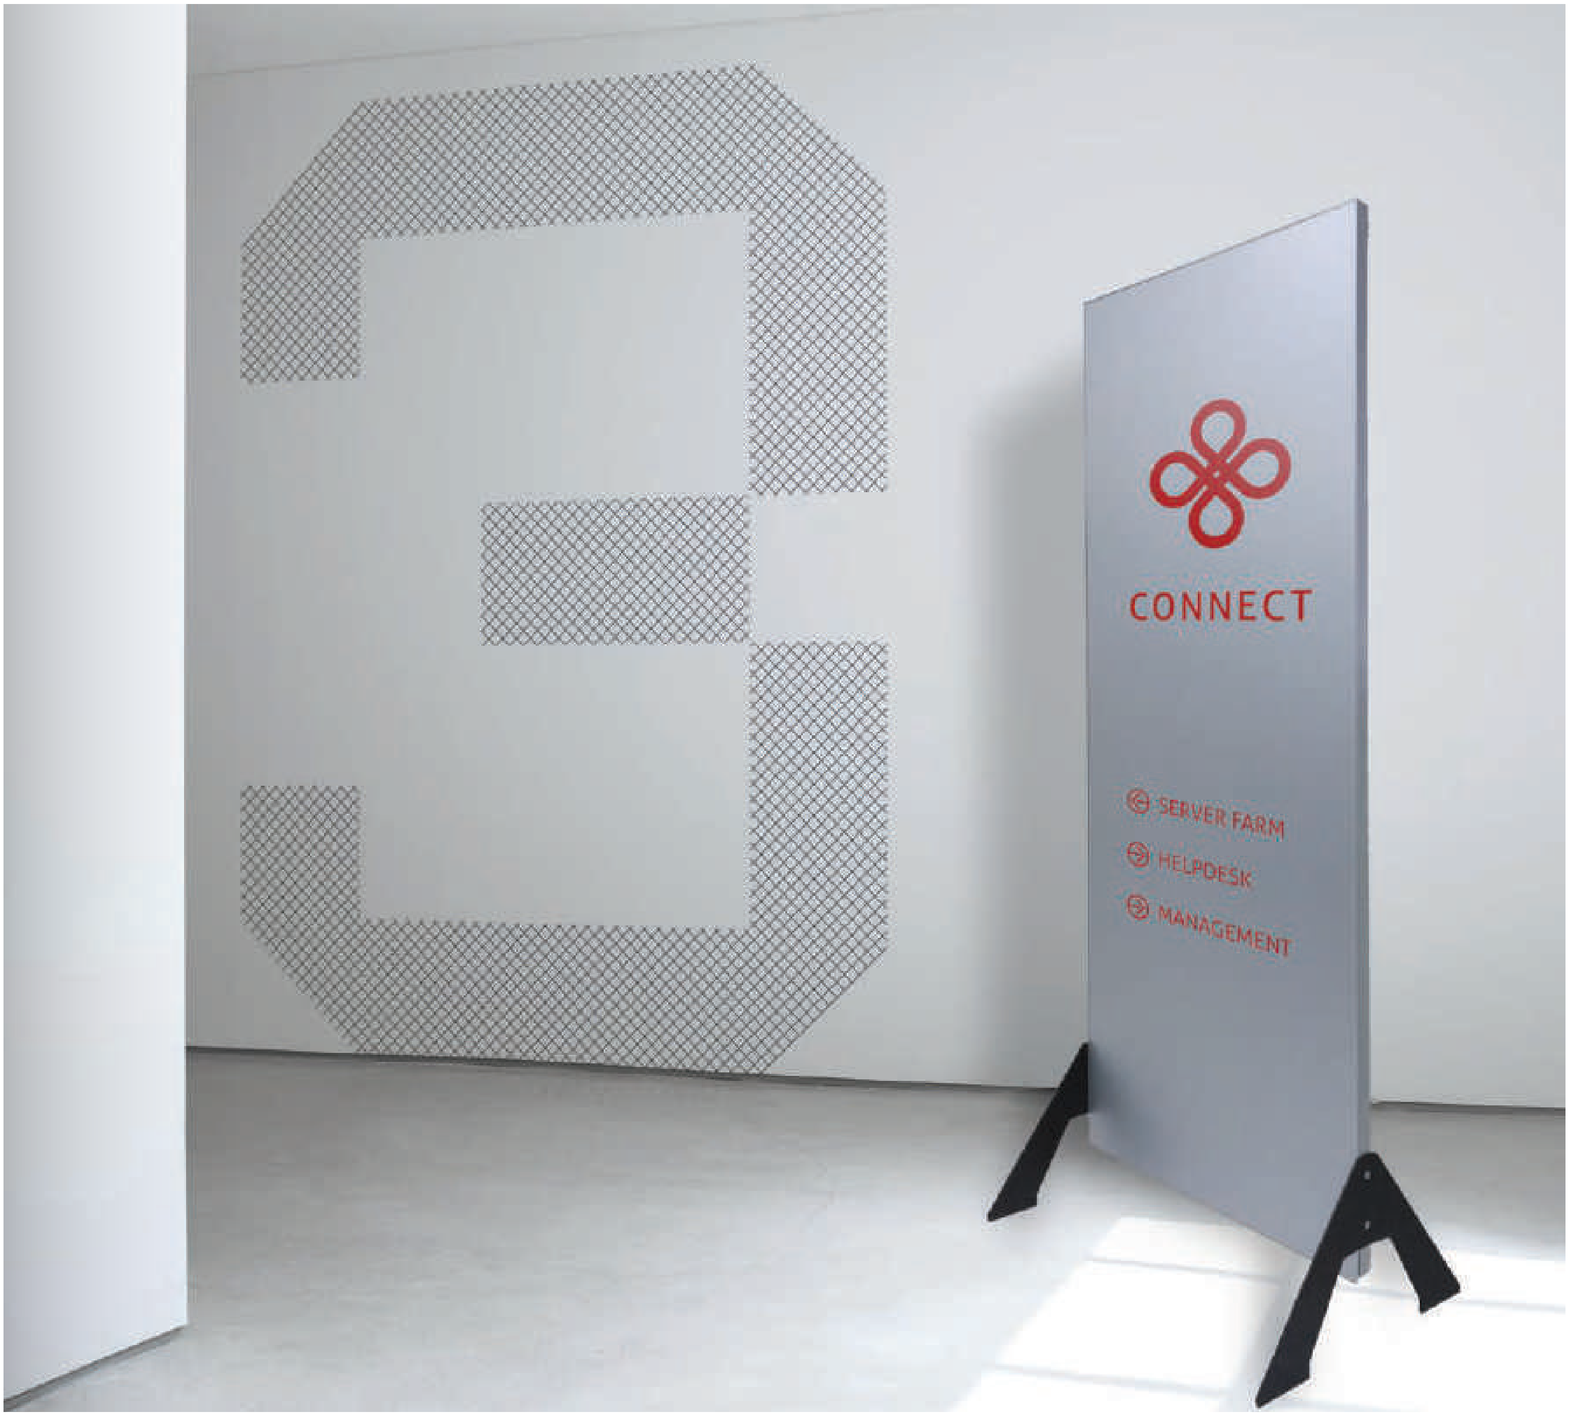
Double Sided Pylon



Pylon Signs

Vista Sharp double sided pylons are built from a whole, double sided frame, held upright by 2 designed, elegant legs. This elegant type of sign can accept several graphic substrates, including D-bond panels, Magnetic "papers" and more.

Its frameless look emphasizes the content of the graphics, which helps delivering the message clearly, making it a great choice for showrooms, lobbies, office buildings etc.

Vista Sharp

Table Stands

Welcome
- PLEASE COME IN -

Table Stands
Vista Sharp's table stands come in two versions, one that includes end caps, and another with a "Full frame" that includes a stylish aluminum extrusion (cut to a 45 angle). This type of sign will be often used to hold any content relevant for counters, bars or tables such as title and name at a working station, instructions or special information.

Vista Light

Lighting up your way

Illuminated Vista Signs

- Convex, double sided signs
- Flat light boxes
- Perfect for advertising
- Easy assembly
- Clean, streamline design
- Aluminum and black finishes
- Environmentally friendly

The Vista Light series includes 2 product lines:

- Convex, double sided signs
- Flat light boxes

The convex, double sided signs can be illuminated with the addition of interior LED lighting, or used with standard sign substrates without illumination.

This line, which is based on Vista System's Modular Curved Frame Technology, has a wide array of sign types: Wall Frames, Projecting Signs, Suspended Signs, Pylons, Post Signs – all can be used with or without lighting.

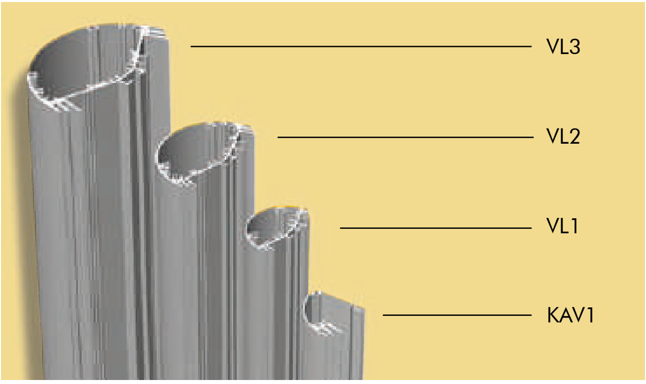
THE NEW ART
MARCH 10, 2007

Meeting Rooms

Meeting Rooms

Vista Light convex frames are offered in ten different widths from 250mm/10" to 1200mm/48", and can be ordered in various heights to accommodate a wide range of applications. This diversity is achieved thanks to 4 profiles: 3 double sided VL profiles, and another 1 single sided profile.

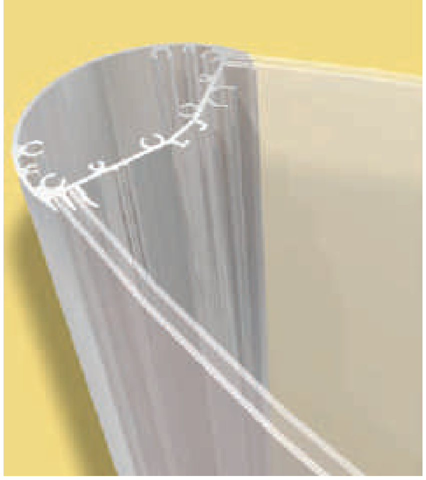
Depending on the sign measurements, reinforcement elements can be added in order to strengthen the sign structure.



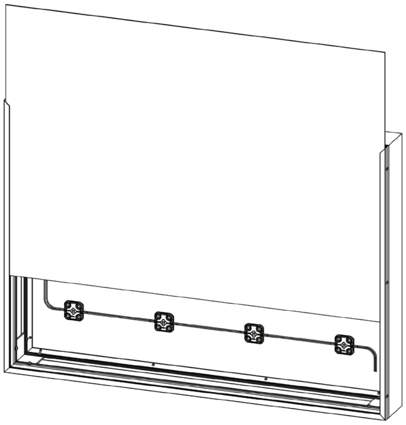
Profile Sign Width	VL250	VL300	VL400	VL500	VL600	VL700	VL800	VL900	VL1000	VL1100	VL1200
VL1	V	V	V	**							
VL2				V	V	V	*	*	*	*	*
VL3							V	V	V	V	V
KAV1	V	V	V	V	V	V	V	V	V	V	V

** Wall Mounted | * up to 2000mm

The unique design of the system allows the use of two panels for inserting temporary artwork that needs to be changed out often, such as posters.



Vista flat Light Boxes are available both in single and double-sided formats. These signs are composed of an aluminum frame and a pane (or 2 panes) of frosted substrate. For easy change of graphics, the frame opens on one side, allowing the graphic substrate to slide into specially designed channels.



Suitable for both indoor and outdoor use, Vista Light frames are a perfect solution for show rooms, lobbies, displays, parking garages, advertising, point of purchase, shopping malls, trade shows etc. Its clean, streamline appearance harmonizes with the entire project.

Standard finishes for VL profiles are available in silver or black anodize.

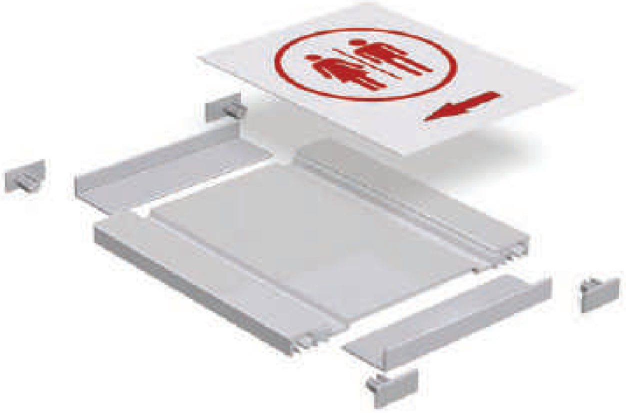
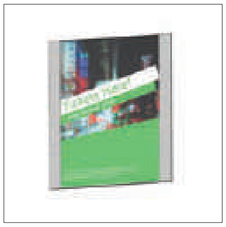
Flat Modular Way-Finding System

- Flat design
- Special profiles for non-flexible inserts
- Aluminum and black finishes
- Smart stable end caps
- Featuring the "Floating" design
- Environmentally friendly

Vista Square is a leading Flat Modular Sign System that is both elegantly designed and technologically advanced.

The system offers a variety of flat signage solutions designed to match and complement any project: wall signs (standard, floating, floating corner, directory), table signs, suspended signs and flag signs.





Exit
Cafeteria

Information

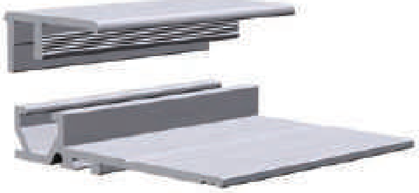
Vista Square system supports both flexible and non-flexible inserts. Three types of profiles are the heart of the system:

A. Uniform profile for small sized signs
B. Single extrusion profile for large signs requiring **flexible inserts**
C. Multi piece profile for large signs requiring **non-flexible inserts**

A

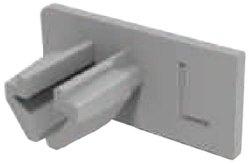
B

C

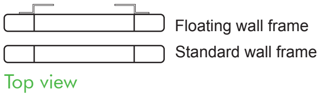


Updating the sign is quick and easy. If the insert is flexible you can simply apply a suction cup to pull it out. In case the insert is not flexible, you simply disconnect one of the special cover extrusions mechanically fastened to the frame and take the insert out.

Vista Square uses smart stable end caps, perfectly adjusted to the profiles. No screws or glue are required. End caps are available in grey and black finishes.



"Vista Square Float" design is the system's crown jewel. The floating affect (the signs appear as floating in front of the wall) is achieved thanks to a special floating profile that is attached to the back of sign frame.



Vista Square frames can accept ADA technology inserts. We supply ADA inserts, ask your Vista rep. about it!

- The system supports a great variety of sizes leading up to 100cm X 100cm / 40”.
- The aluminum parts of the system are available in 2 finishes, aluminum and black.
- The system supports insert thickness of up to 3mm / 0.12”.
- The minimum height for directory slats will depend on the type of graphic implementation.

Legend - Graphic Implementation

①	Paper graphics with polycarbonate cover of 0.5mm width
②	Vinyl on polycarbonate cover of 0.5mm width
③	Paper graphics with polycarbonate cover of 1mm width
④	Vinyl on polycarbonate cover of 1mm width
⑤	Paper graphics with polycarbonate cover of 2mm width
⑥	Vinyl on polycarbonate cover of 2 mm width with reinforcement tape
⑦	Paper graphics with perspex cover (cast) of 3 mm width
⑧	Vinyl/print on Xbond board of 2mm width
⑨	Vinyl/print on aluminum board of 0.5mm width
⑩	Vinyl/print on aluminum board of 0.8mm width

For each sign in the catalog you'll find our recommendation regarding the appropriate graphic implementation. Please consult the Legend.

Square Sign Sample Case

Our Square sample case contains 7 sign types including graphics and our full product catalog.

Square Display Sign Kit

An elegant presentation featuring a wide selection of flat sign samples mounted on a back board; ideal for reception area, show room or office display.

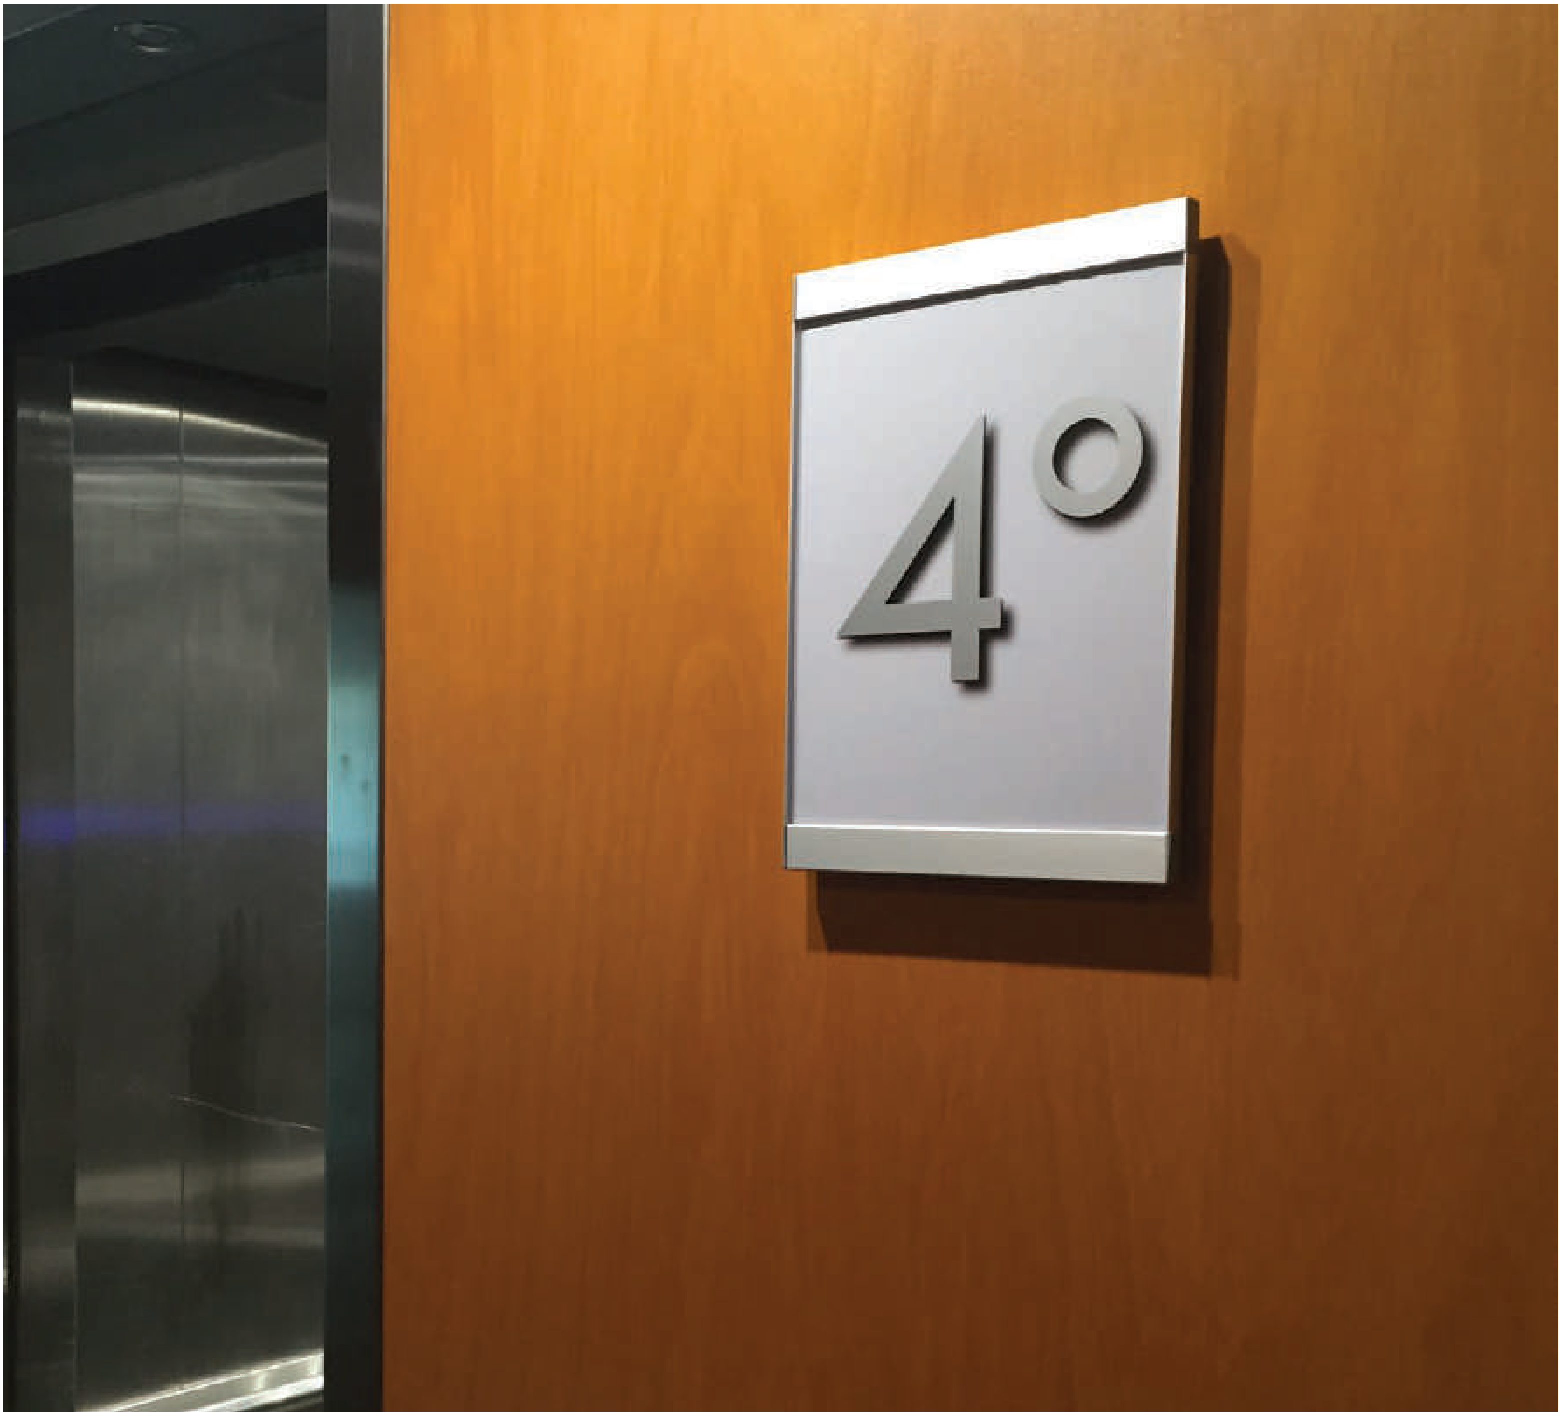
Wall Frames - Portrait



Wall Frames - Portrait

The Vista Square portrait wall frames (also available in an eye catching floating design) are a perfect choice for room identification signs, bathroom signs and general way-finding signs. The portrait position is determined by the position of the end caps on the bottom and top of the sign frame.

Vista Square

Wall Frames - Landscape

Wall Frames - Landscape

The Vista Square landscape wall frames (also available in an eye catching floating design) are ideal for room identification, bathroom signage and general wayfinding. The end caps on the right and left side of the sign frame determine the landscape position.

Suspended Signs
Suspended signs are mostly applied as hallway wayfinding signs and long lasting promotional signs (seeing as how updating them at such heights frequently is not very efficient). Suspended signs can be designed to meet your specific measurement requirements.

Flag Signs

Flag Signs
Flag Signs, who are also known as projecting signs, are very good at attracting the public's attention and are most commonly used to identify bathrooms, public areas, meeting areas, security information and a more recent trend is in airports as a lounge indicator.

Table Signs

Table signs are most often recognition and promotional signs as opposed to traditional way-finding signs. Such table or counter top signs will be used to introduce the person at the given work station (most often title and name), working hours, special information/instruction and many times will include a built-in brochure or business card holder.

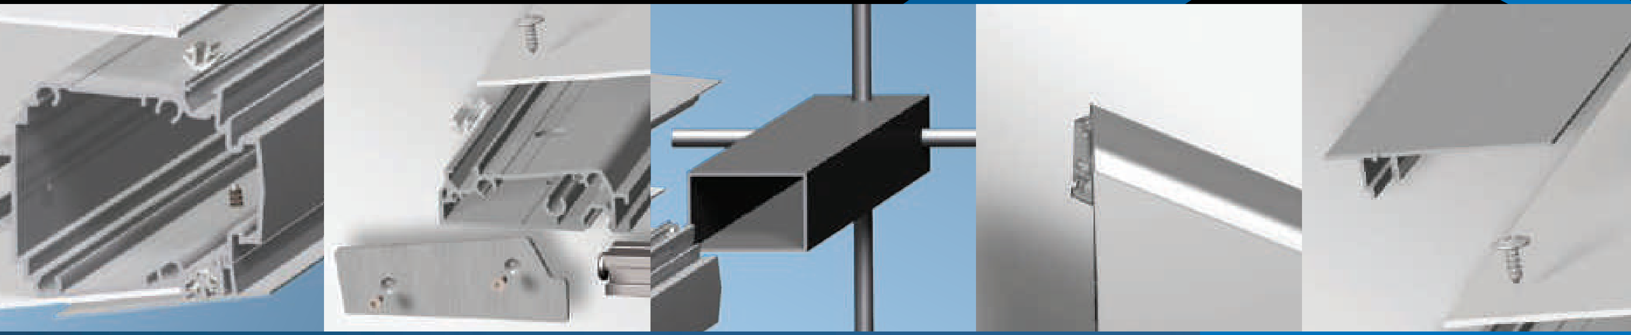
Vista EXPAND

Expanding your horizons



STRASBOURG
ROAD E25

Big Sized Sign System

- 700-1400mm wide
- Up to 4 meters high
- Firm grip of the graphics insert
- Ultra smart profiles
- Partial / full end-caps
- Easy installation and updating
- Environmentally Friendly

The new Vista Expand series offers extra large signage solutions.
This new environmentally friendly series features state of the art technology and ultra modern design to create the best solution in the market for projects requiring big signs. The Vista Expand series is designed to offer indoor and outdoor signs ranging in size from 700-1400mm wide and up to 4 meters high. It features a very clean and elegant look with a minimal curve.
Three types of products are supported by this exciting new series:

- XL pylons signs
- landscape and portrait XL wall signs
- landscape and portrait XL post & panel signs

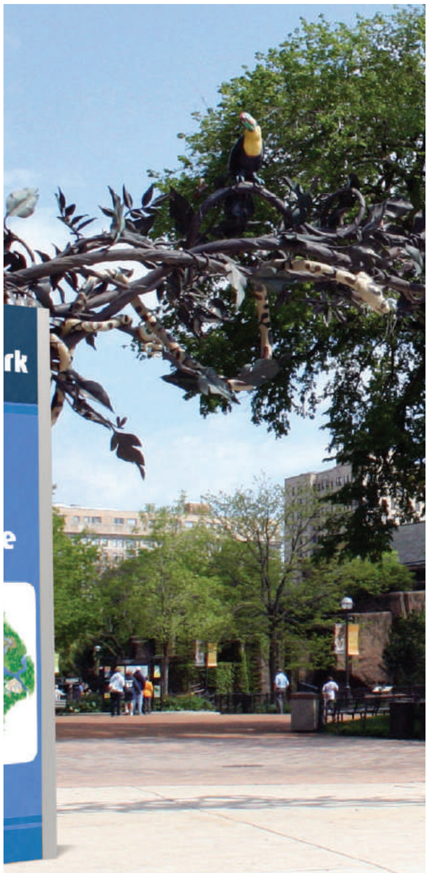
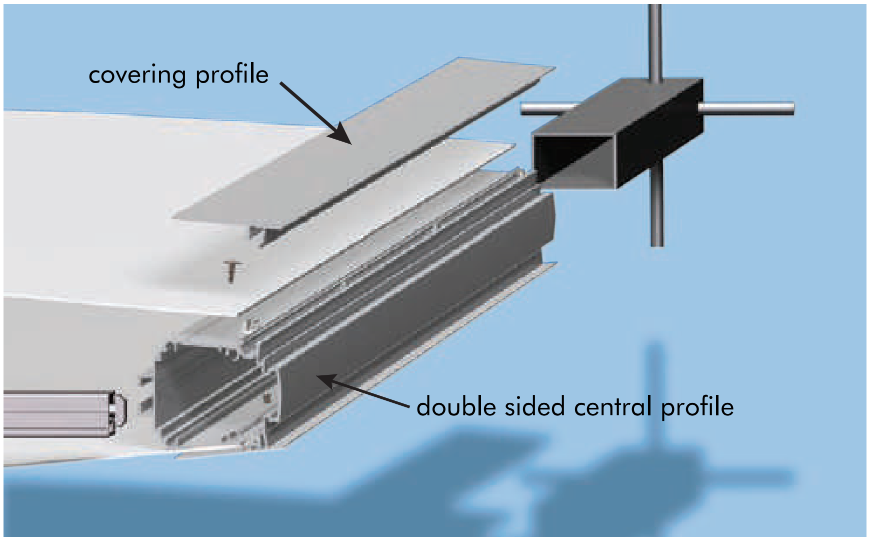
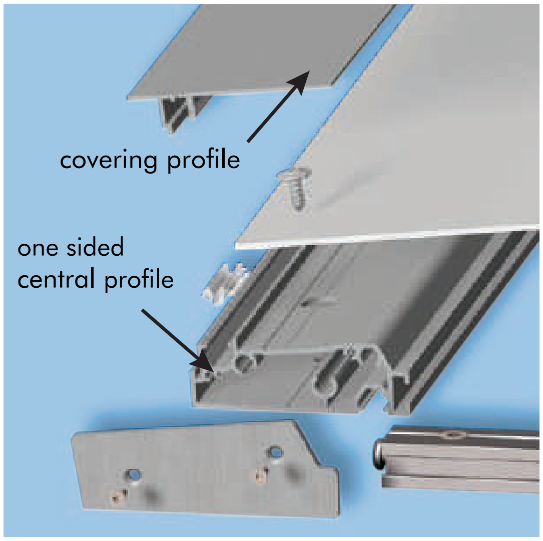
CHINATOWN
DOWNTOWN CROSSING



The Vista Expand series features a smart profile design.
It uses only 3 types of aluminum profiles: A central profile for double sided signs, a central profile for one sided signs and a covering profile. The covering profile is inserted into the main profile to create deep tracks inside the main profiles to better grip the inserts. Pylons can be installed using metal construction profiles inserted into the ground.



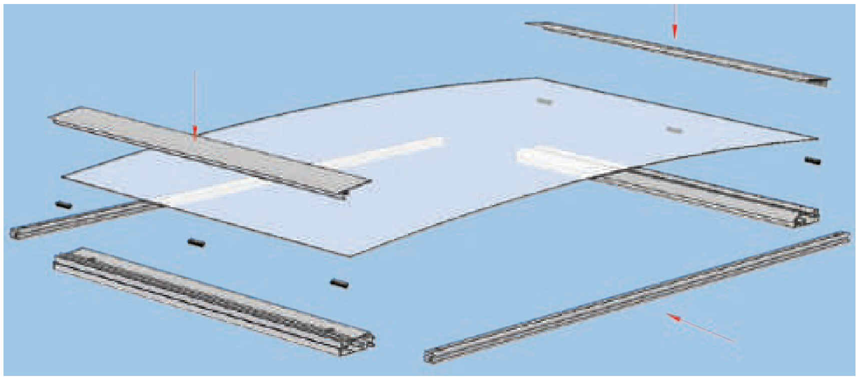
covering profile
double sided central profile



covering profile
one sided
central profile

The sign frames accept digital printing or vinyl to present updated information. The default insert material is 2mm Xbond sheets. Any other flexible and strong insert can be used if needed. Paper inserts are not recommended.

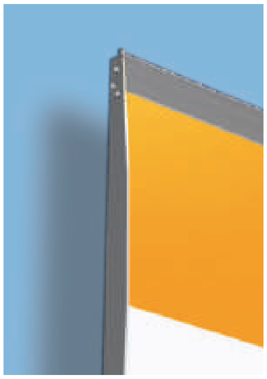
Changing the inserts is fast and easy; you just remove the covering profiles, open the fastening screws if needed, replace the inserts and close the sign again.



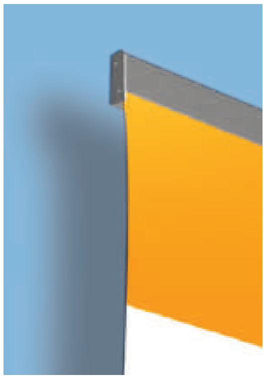
Scan the QR in the end to watch the full assembly video.

There are 3 possibilities for end caps in the Expand series:

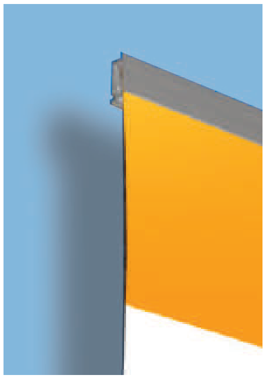
- No end caps at all
- Small end caps that cover only the extrusion cuts.
- Full end caps "from side to side"



full end caps



partial end caps



no end caps

- The insert replacement process is swift and simple and can be completed by the in-house staff.
- Profiles are available in 2 finishes, aluminum and black.
- Other lengths than specified in the catalog can be ordered.
- Vista Expand is a Green environmentally friendly series.

The clean and flexible design of Vista Expand, consisting of ultra smart profiles and connections, and the ease of installation and updating of the signs, makes this series a true groundbreaking phenomenon in the sign industry.

Order a Vista Expand Sample

As a sign professional you know what a huge difference it makes to hold the product in your hands. Only then can one fully understand the true quality of it.

The Vista Expand sample, includes an informative brochure and a wall sign, XP700*300mm, with two types of end caps: a pair of small end caps that cover only the extrusion, and one whole end cap from side to side.

This sample sign helps you get a full understanding of the structure and assembly of the Vista Expand signs.

See for yourself how elegant and easy using Vista Expand signs are!

Vista EXPAND
EXPANDING YOUR HORIZONS

Despite the large proportions of the series, installation and updating of the signs is easy and hassle free. Vista Expand proves that bigger signs can also be modular, flexible, easy to deliver, install and maintain!

Try for yourself!

and see how elegant and easy using Vista Expand signs are.

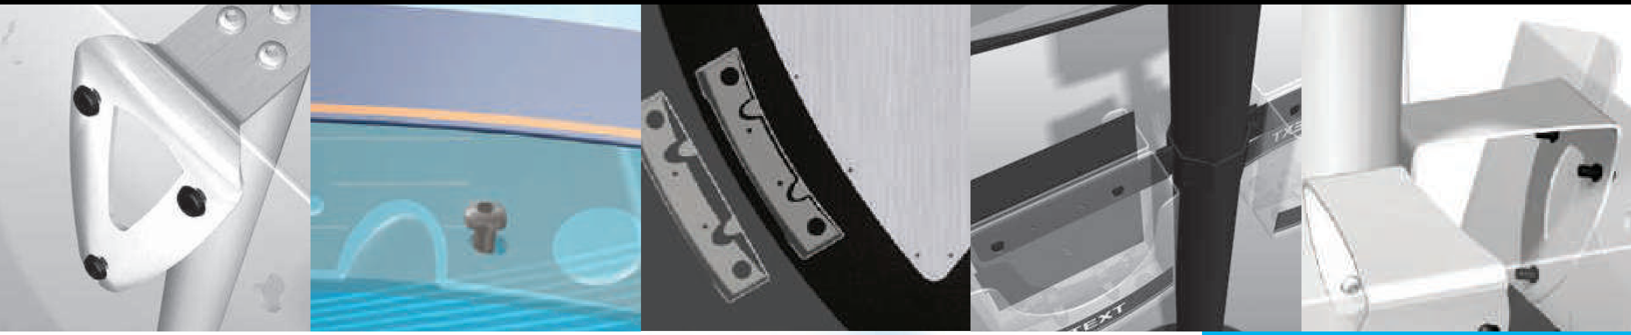
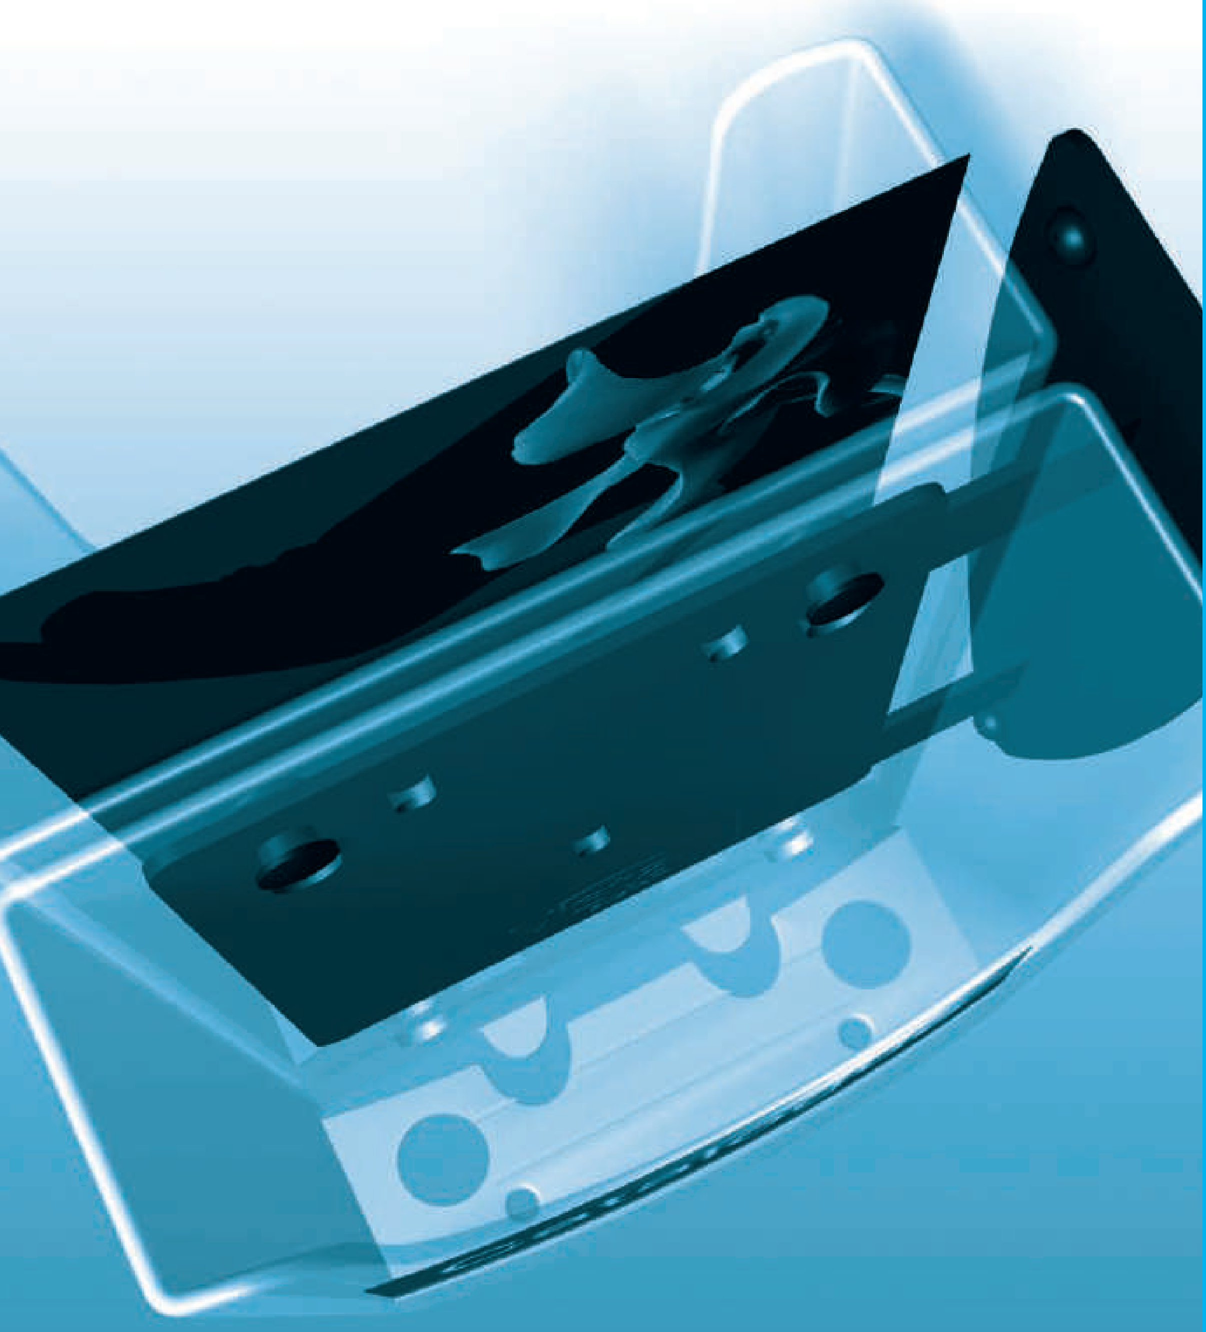
Vista BH

Stores it for you





Innovative Brochure Holder

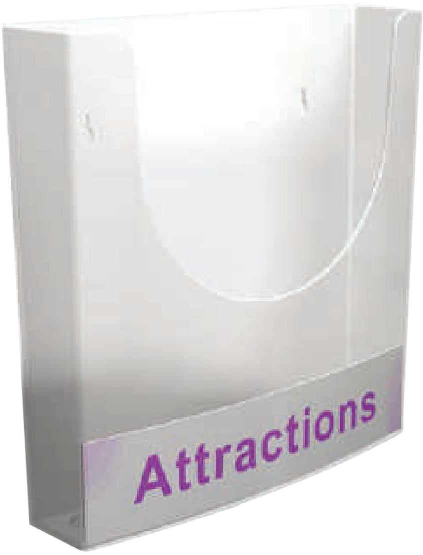
- High quality clear polycarbonate tray
- Fits onto curved and flat surfaces
- Accommodates a removable front insert
- 3 standard sizes
- Combines perfectly with Vista frames

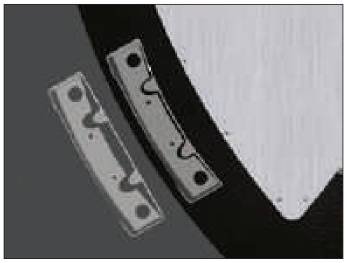
The Vista System Brochure Holder is specifically designed to fit onto curved surfaces, as well as flat ones, to create endless possibilities of displaying brochures.

The brochure holder is elegant and modern, yet non dominant (being transparent) and can be beautifully incorporated with any product or surface it is attached to to create a modular and homogenous new product.

The success of Vista BH is deriving from the ability to renovate and add something extra to the product's function, by way of actually subtracting material. Another aspect where Less is More!

Subtracting material from the bottom of the brochure tray releases the back of the product, allowing it to curve in alignment to the curve of many curved frame sign products. This characteristic allows an easy and convenient attachment of the brochure tray to any sign – be it flat or curved!

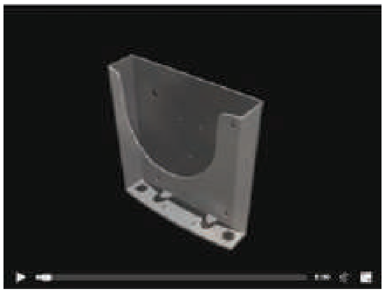




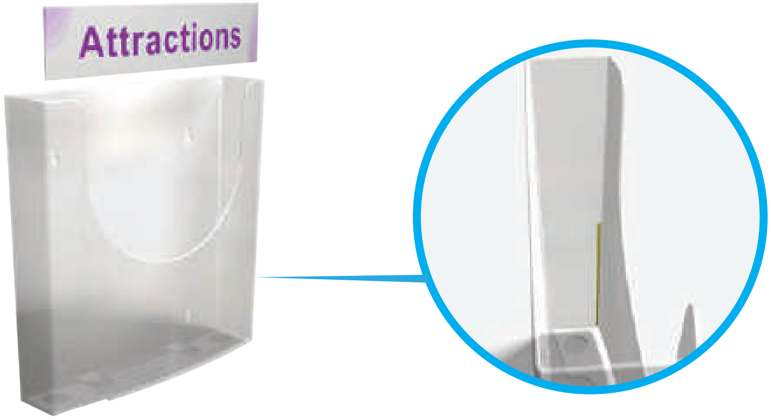
Information

Vista BH in action!

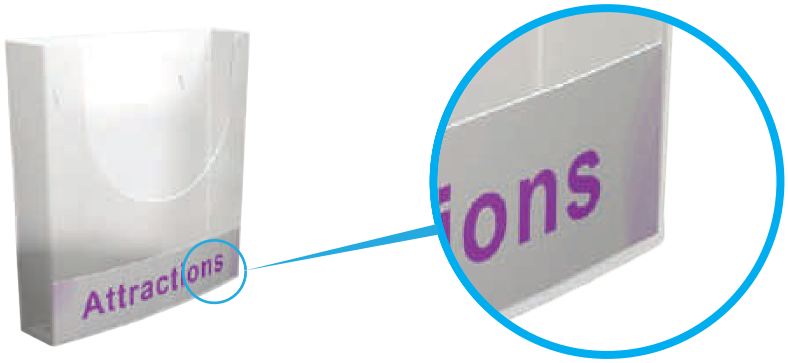
Designed to fit onto curved and flat surfaces, Vista Brochure Holder is a true innovation! Scan this QR and watch this video demonstration to see how it works.



Subtracting material from the tray's two frontal inner corners, creates a "drawer mechanism" which allows printed inserts, containing diverse data, be it wayfinding or other information, in the frontal inner side of the product.



Subtracting material to accommodate the use of removable insert



The brochure tray can be ordered individually or in combination with any Vista System sign frame. View selected products in the following pages.

Each product has recommended connectors for installation. Full product list and connectors information can be found at vistaBH.biz

Brochure Holder KIT

The kit includes one unit of each size and a postcard with offered products. You'll be able to appreciate this beautiful smart product only when you hold it in your hand. Get your BH sample today!

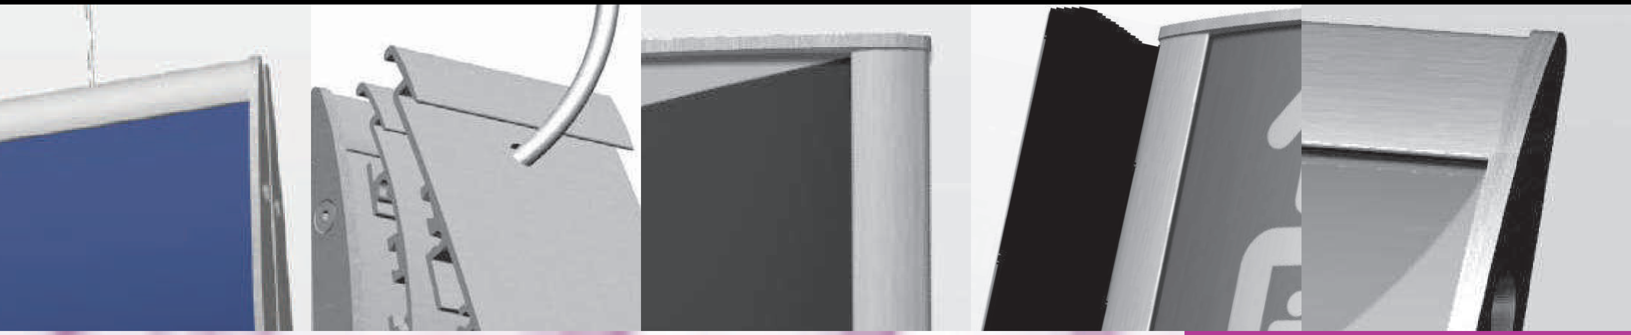
Vista NOVA

Ignites your imagination

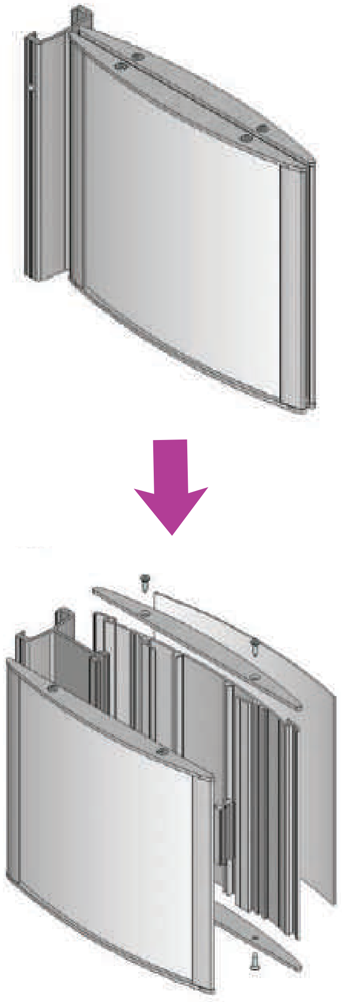


Fresh Curved Way-Finding System

- Curved design
- A variety of sign types
- Fits to standard paper sizes
- Easy to update
- Environmentally friendly

Vista Nova is a newly designed, curved wayfinding signage system.

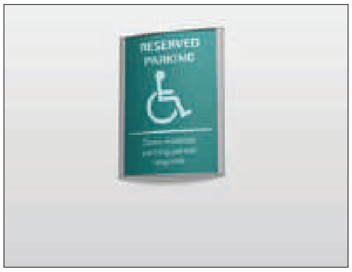
The side-channels of the aluminium frames give the signs a sleek, elegant look, which cannot be ignored.



The signage types which exist in Vista Nova include:

- Wall frames
- Flag signs (projecting signs)
- Suspended signs
- Table signs

Inpatient Units



The system is designed to handle most applications and materials used in the sign industry (printed-paper, engraved, embossed, screen-printed substrates, photo-metal, photo-polymer, vinyl graphics, tactile, and more). The materials used include polymers and metals of all types, plastics, paper, etc. Any material with flexibility and the correct thickness may be used as an insert with Vista Nova frames.

This modular system is composed of standard units that can be assembled in different ways to create a wide range of applications that cover the entire signage project. See for example on the right the components of a projecting sign.

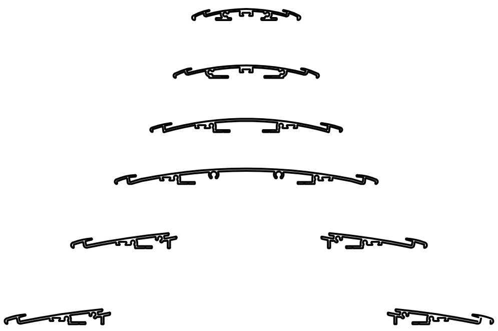
Vista Nova frames can accept ADA technology inserts. We supply ADA inserts, ask your Vista rep. about it!

Vista Nova offers modified widths to fit standard paper sizes:

- Standard paper size A8 (52mm)
- Standard paper size A7 (74 mm)
- Standard paper size A6 (105mm)
- Standard paper size A5 (148mm)

RESERVED PARKING
come
ion
Main
all

Of course, bigger signs can be assembled – such as A4, A3 and beyond using the one sided profile of the system.



Standard finishes for vista profiles are aluminum and black.

Vista Nova comes with modern designed metal end caps. The end caps are available with screws for maximum security to avoid vandalism. The metal end caps are made of aluminum with silver or black anodized finishes and include stainless steel screws.

With the proper graphic implementation on any flexible substrate, these signs are suitable for both indoor and outdoor purposes.

Vista Nova – including the highest standards of Vista System with a fresh, eye-catching look – is definitely the new star in the wayfinding arena!

Vista NOVA

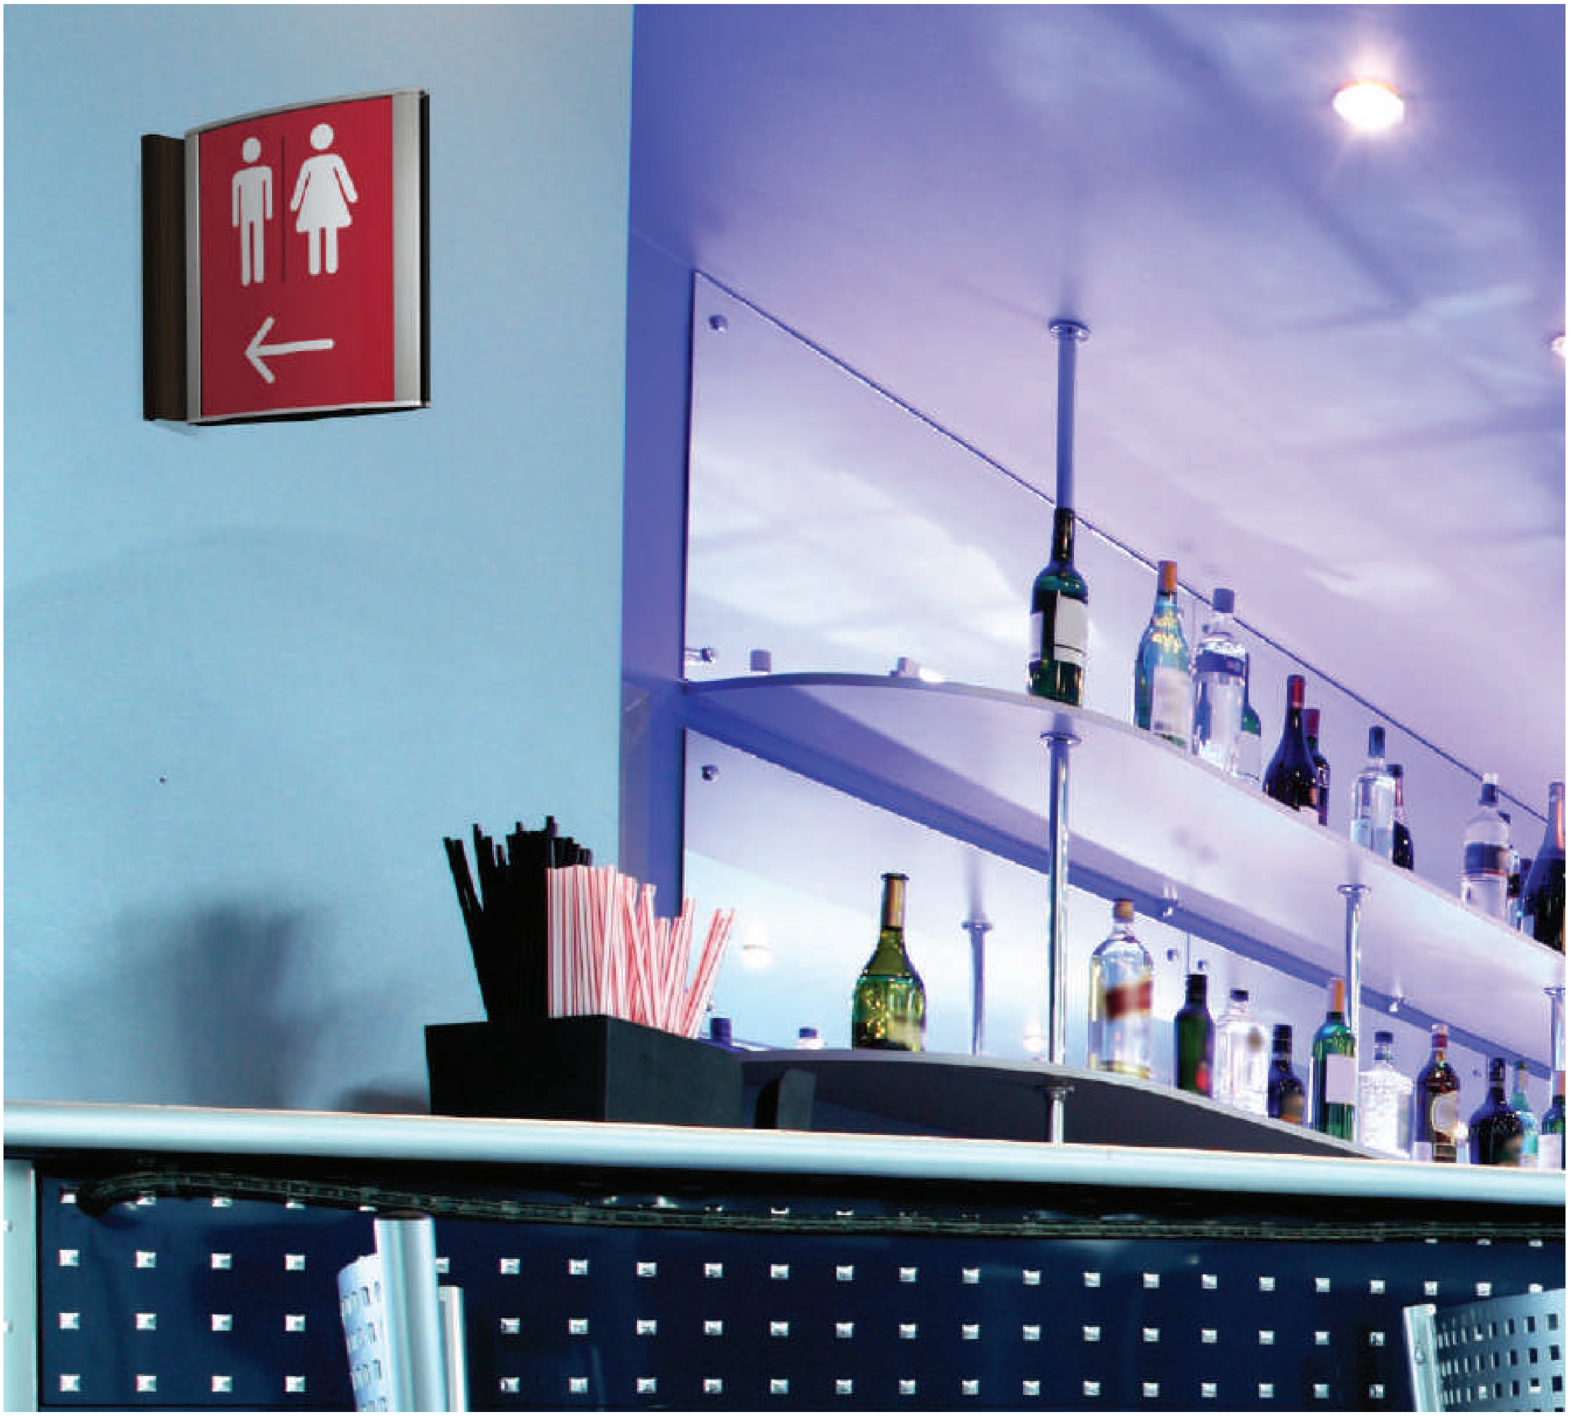
Projecting Signs



Projecting Signs

Vista Nova projecting signs, being perpendicular to the wall, are beneficial because they provide extra visibility not present in the other sign types and are more visible from a wide variety of angles. This type of signs is ideal for displaying all kind of information: directional, instructional, warning etc.

Directories

Wall directory signs are one of the best solutions for directional purposes and/or at-site entrances to increase visibility and orientation for hospitals, hotels, schools, office buildings, universities, airports, etc. Vista Nova offers several types of wall directories: Single sign directory, multi-panel directory and multi-signs directory.

Vista NOVA

Table Stands

Catherine Reno
Administrative Assistants

Table Stands
Vista Nova table stands come in two different designs:

- Kangaroo style – a portrait positioned table stand
- Boomerang style - a landscape positioned table stand

Both types are designed to accept standard paper or other sign substrates. They are available in many sizes, and are very easy to assemble.

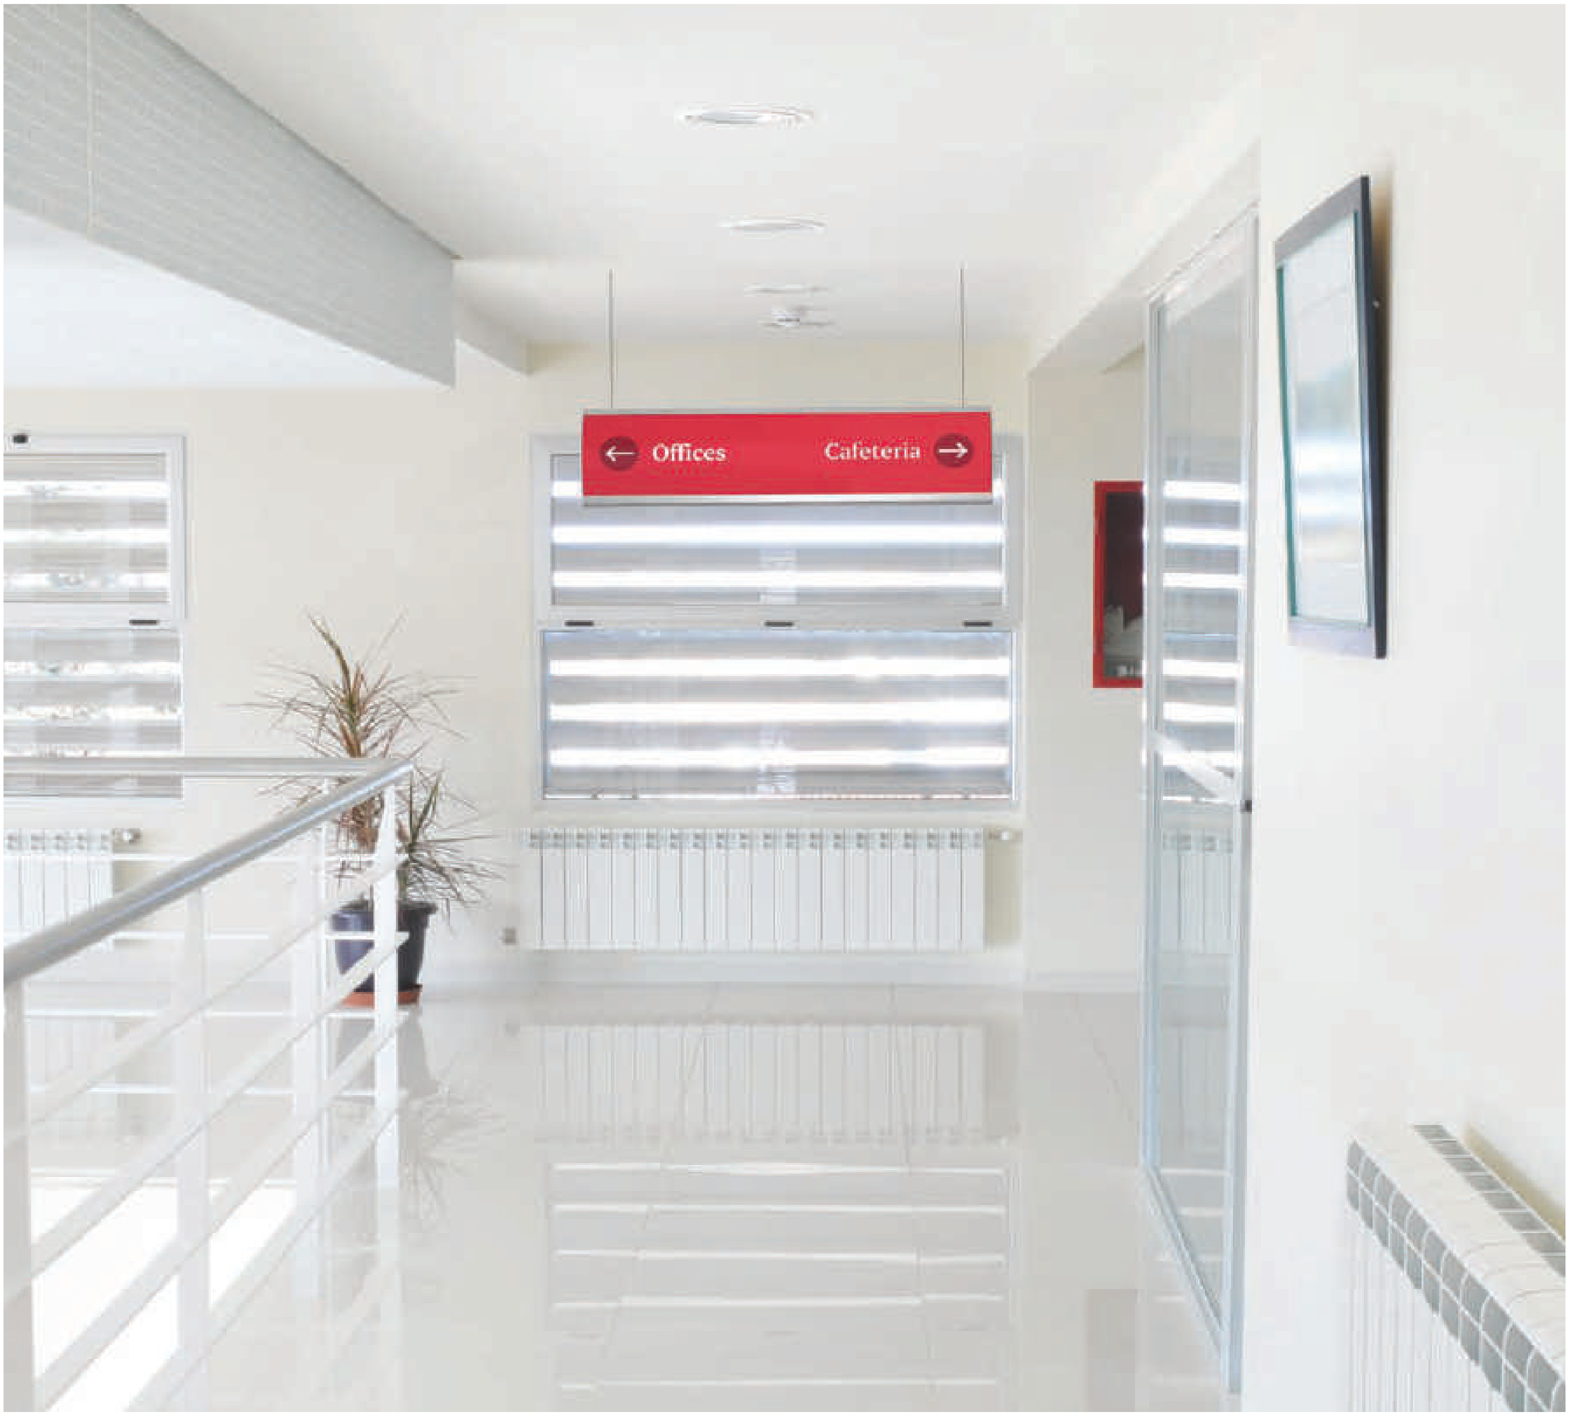
Vista NOVA

Suspended Signs



Suspended Signs
Vista Nova suspended signs are very elegant. They are mounted to the ceiling, so they are visible from a distance and can be seen from a wide range of viewing angles. For this reason they are ideal as way-finding signs at hospital hallways, shopping malls open areas , bank departments and so on.

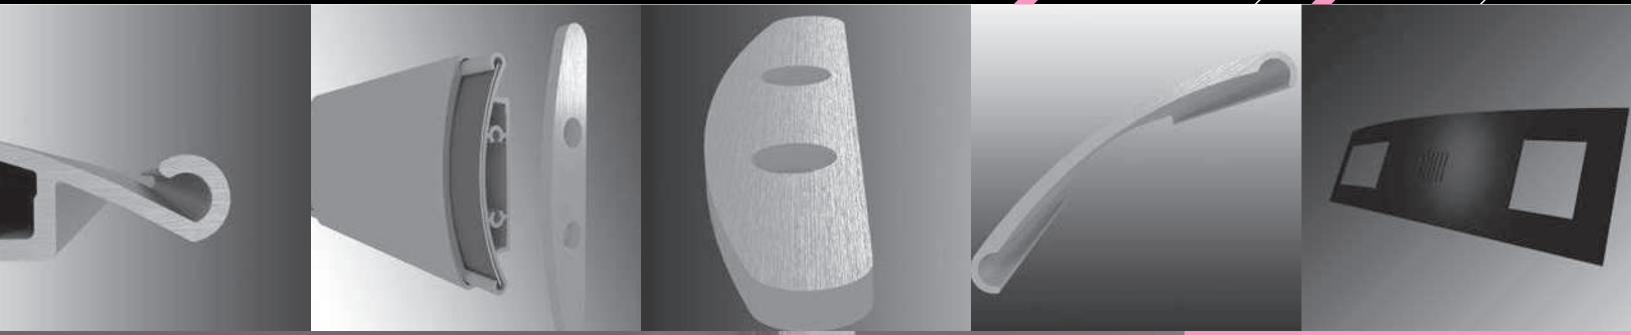
Vista Slider

Simple Communication



Slider solutions for Vista product series

- Alternate message display
- Plastic / Aluminum elements
- Fits to many Vista product series
- Clever and cost effective

As part of its vision to provide a complete solution for any way-finding project, Vista System developed several solutions for slider signs.

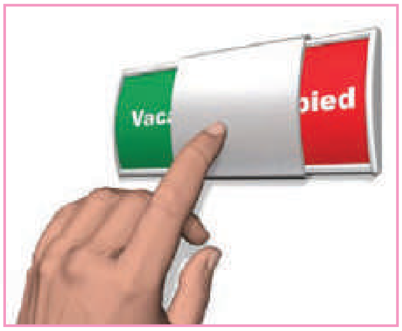
Slider signs realize the needs of the workplace: office buildings, educational institutions and medical facilities can benefit from one sign that functions with alternating graphics as a multiple way-finding solution! It is both clever and cost effective.

Type 1: Aluminum Slider

This is a horizontal oriented wall sign with an aluminum slider profile that can be used to display alternating messages! It is perfect for displaying "OCCUPIED/VACANT", and comes in our standard Vista curved frame extrusion.

As you have come to expect from our products, it's smart, elegant and very easy to install and update.

This slider element is available for our V40, V60 and V80 extrusions and in any length required up to 14 feet.



Scan the barcode to view the slider in action!

http://goo.gl/7o3KuZ

Type 2: Plastic Slider

A combination of a plastic slider element, embedded into an existing aluminum wall sign, allowing interchangeable graphics on top, while the bottom slider provides the necessary "Open / Closed" function.

This option of a plastic slider element comes in 3 width sizes: 200, Letter and A4, and can fit our top three way-finding series:

- Vista System
- Vista Square
- Vista Nova

Opening Hours
Open Monday-Friday

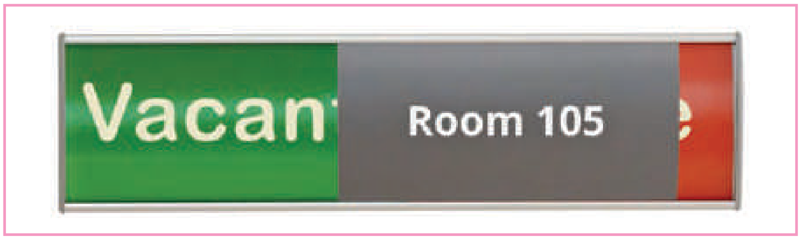
Sunday - Closed
Open

John Paulson
Managing Director
Free

Conference
Room
Available

Type 3: Basic Slider

A polycarbonate slider element is inserted into the channels of the sign and moves along those channels. This slider element can be incorporated in the Vista and Vista Square line of products. In this case, the slider element size is a direct derivative of the chosen sign frame. This kind of solution allows a presentation of fixed graphics on the slider element, in addition to the interchangeable graphics underneath.



Now it is easier than ever before, to display the availability of offices, clinics, conference rooms and classrooms. The aluminum sign frames are strong, vandal proof, easily maintained and require no special tools for mounting on walls, doors or various other materials.

The slider elements provide yet another personalization element and the frame is providing just the right background, without dominating to message.

Vista Slider signs are now available in a variety of lines: Vista, Square and Nova. They are now more than ever, OPEN FOR BUSINESS!

Vista Slider video campaign is the winner of the Smile Festival, European festival of Publicity and Humor.

Watch the award winning video here!

Curved Name Tag

- Practical, high quality name plate
- Elegant and presentable design
- Super strong magnet fastening
- Simple graphic updating

Vista System provides a complete solution for any signage project, from the parking lot signs, through the hallways' way-finding, directional and room signs, up to the name badges that the employees wear.

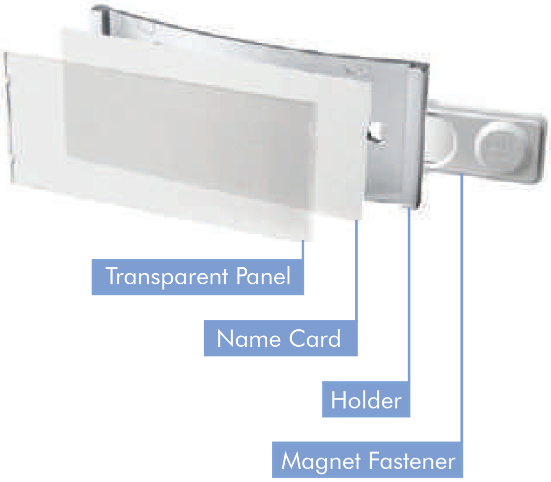
Vista Badge is an elegant, practical and high quality name plate. This product is designed to improve your communication with your clients - no matter which business sector you are in.

Vista Badge is a small, slightly curved sign, directly linked to the winning design of Vista System's entire way-finding system. It can be attached to any garment. The acrylic insert is held together through 2 side channels, which allow an "open" look for the badge's top and bottom.

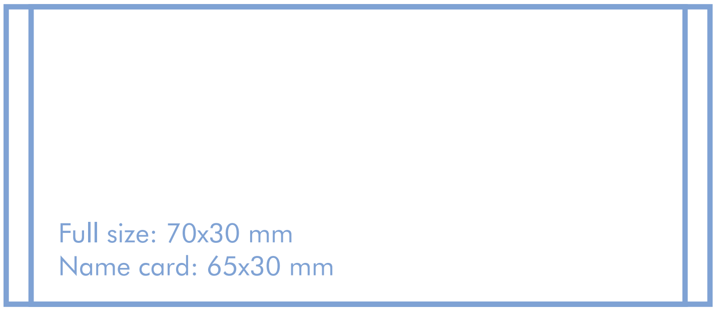
Components

Vista Badge, like any other Vista product, is composed of separate materials, joined together to create one final, complete product:

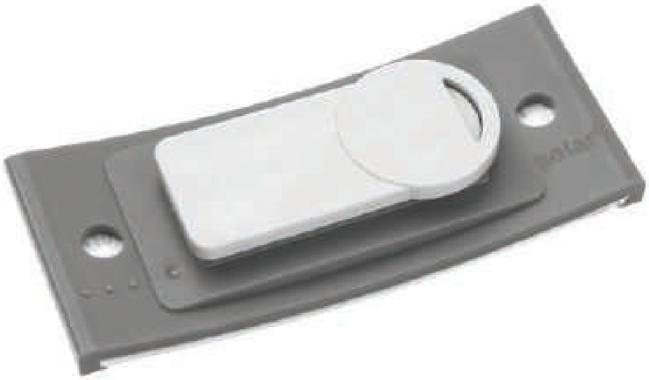
- A frame joining the graphic contents - galvanized plastic with a matte metallic finish.
- An insert for the personal printing of the badge content.
- A highly transparent panel made of scratch-resistant acrylic glass.
- A very powerful magnet back clip, to hold the badge onto the garment.



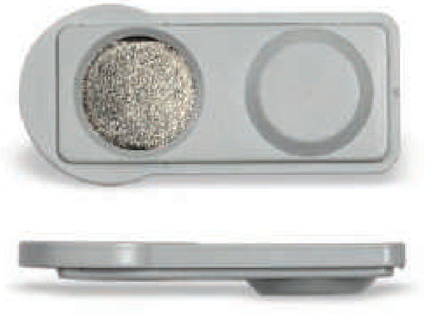
The Vista Badge size was not a random choice. It is big enough to support the required information at a short glance, yet compact enough to be comfortable rather than cumbersome.



Back view of Vista Badge:



The base magnet and the counter magnet are securely interlocked (twist-proof).



Updating the graphic content of the badge is simple and easily done independently on any computer. The name inserts come as a ready sheet of printed paper, already divided to the exact size. While printing, the insert is held by the sticky back part of the sheet, but can be detached and used individually when required.
One may print the content on the sheet by any inkjet or laser printer.

Help your employees be more presentable and enhance the customer service they provide.

Vista Badge is one more product, allowing us to provide a complete solution for any signage project.

Improved Communication

Vista Badge allows any team to connect with its audience immediately, no matter the business sector:

- Sales & Service
- Hotels & Tourism
- Exhibitions & Events
- Healthcare
- Information & Customer Service

Something new in the sign industry!

Wouldn't it be nice to offer your clients a sign system designed for their specific business instead of showing a general collection of sign types?

A special design team at Vista System has been dedicated to researching, surveying, and designing unique families of products to match specific business segments.

Vista System is the first in the world to offer a unique line of signage products designed specifically for:

- Health Care facilities
- Libraries
- Railway stations
- Hotels
- Gyms
- Management needs

And more…

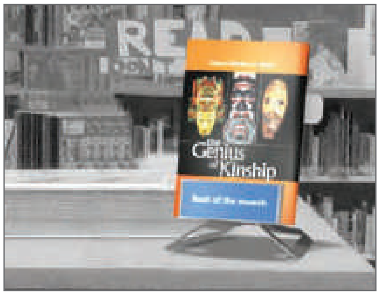
We feel this is a refreshing breakthrough in the sign industry!

Vista Healthcare line
Vital signs for the healthcare sector

Vista Healthcare Line is a system of wayfinding products that was designed and created with only one focus in mind: the specific signage needs of healthcare institutions.

Vista Libraries line
Cover to cover signage solutions

We don't sell or lend books – this is done by bookstores and libraries. We design and create the signage systems that help you find your way inside the libraries.



VistaRailways

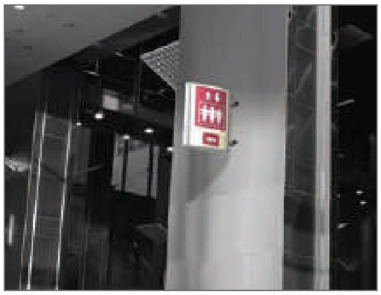
Innovative sign solutions for the rail industry Line

There is no need to look further; an entire solution for railway signage is finally here!

Vista Hotel line

Five stars signage solutions

Vista System is the first in the world to offer a unique line of signage products designed specifically for hotels.



Get bored work out alone?
Bring a friend & get
2 entries for the SPA

Vista Gym line

Shape up your Fitness club signage

A flexible, modernly designed system that covers all the signage needs of any Fitness Club.

Vista Management line

A sign of good management

Running a business, establishing an organization, managing employees… If you want to work, display it!
